

EZY-TURN[®] #2

GENERAL PURPOSE GATE VALVE SEALANT

DESCRIPTION

EZY-TURN #2 is a general purpose gate valve sealant for use where hydrocarbon resistance is important. This clear, amber lubricant is formulated from a blend of vegetable and synthetic oils that are both chemically stable and naturally corrosion resistant.

EZY-TURN #2 contains no solid fillers and is easily pumped with a high pressure lubricator at temperatures as low as -18°C (0°F).

EZY-TURN #2 will seal against leakage and protect precision gates valves from scoring, galling and corrosion. Extremely resistant to water, EZY-TURN #2 is the product of choice for general industrial and oilfield use.
